[Tutorial] Launch Your First Rails App on Cloud9

This tutorial aims to help you start your Homework#2.

Step 1: Open the same environment as in Tutorial 1.

Step 2: Download the homework repo from Github and cd into the repo.
Fork the repo from https://github.com/saasbook/rottenpotatoes-rails-intro to your personal GitHub

```
$ rvm use 2.4.0
$ git clone https://github.com/your_user_name/rottenpotatoes-rails-intro.git
$ cd rottenpotatoes-rails-intro
```
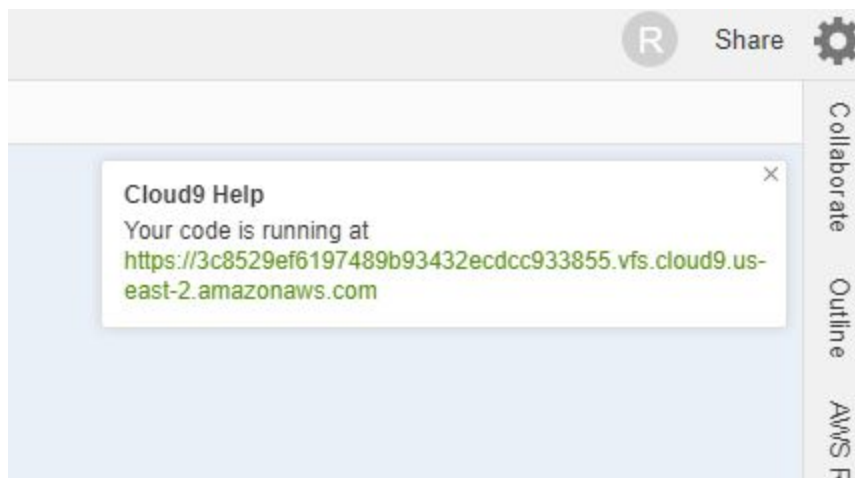

Step 3: Run "bundle install".

```
$ bundle install --without production
```

Step 4: Create database and start the app.

```
$ bundle exec rake db:setup
$ rails server -p $PORT -b $IP
```

Step 6: Click on the link in the pop-up dialogue (near top right corner of the IDE) to view the app.

Now you have started your rottenpotatoes application.

You should see something like this:

Rotten Potatoes!

All Movies

Movie Title	Rating	Release Date	More Info
Aladdin	G	1992-11-25 00:00:00 UTC	More about Aladdin
